

Solutions for **CYBER SECURITY**

Whether you're an accountant, retailer or a manufacturer, your greatest assets are your people and your ideas. Technology has made it easier to create, collaborate and deliver your services to customers both around the corner and around the world. But as your employees continue to work from home and your business moves online, you also become a target for cybercrime.

Why should you be concerned with Cyber Security?

1. Cyber crime is the fastest growing crime in the world, but most attacks are not covered by standard property or crime insurance policies.
2. Systems are critical to operating your day to day business but their downtime is not covered by standard business interruption insurance.
3. Data is one of your most important assets yet it is not covered by standard property insurance policies.
4. Third party data is valuable and you can be held liable if you lose it.
5. Retailers face severe penalties if they lose credit card data.

Cyber Insurance can help...

- Recover and re-create important files and data
- Guard you against fraudulent payments
- Limit the fallout of a data breach or other cyber event

And Cyber Insurance can cover...

- Cyber incident response costs
- Comprehensive cybercrime
- System damage & system business interruption
- Privacy liability & breach notification costs
- Risk management services

Don't put your business, assets, employees or customers' data at risk, call the Skarin Agency and get yourself covered.

Utilize our resources and put our expertise to work for you.
You should expect more. Come see what makes us different.
